BORINGS FOR OIL AND GAS

Viking Well No. 1, 2310 ft.: gas flow at 2333 ft. Small amount of heavy oil reported in Wells Nos. 2 and 4, at about same depth.
Vegreville Well, 2000 ft.: small flow of gas at 1360 ft. and 1870 ft.; did not penetrate to gas sand.
Victoria Well, 1840 ft.: small flow of gas at 1565 ft.
Camrose Well, 1235 ft.: gas flow at bottom, not very strong.
Tofield Well, 1203 ft.: small flow of gas at 1065 ft.
Morinville Well 3340 ft.: oily sand at 3262 ft.: no flow.
Athabaska Well, 1770 ft.: small flow of gas at 1650 ft.
Pelican Rapids, Pelican Oil and Gas Co. No. 1 Well, 2069 ft.: gas flow at 653 ft.
Pelican River Well, 837 ft.: strong gas flow at 750 ft. and 820 ft.: streaks of tar sand 734-781 ft.
House River Well, 295 ft.: gas and some oil at 292 ft.
Peace River Well No. 1, 1107 ft.: oil flows at 883 ft., 992 ft., and 1083 ft.
From Information supplied by the Geological Survey.

Tar sands occur
Reported to be fine country similar to the land in vicinity of Ft. Vermilion
Jackfish River
Banks wooded with large spruce
Wheat successfully raised for twenty years
Good water at 6 feet
Flat wooded country
Gently undulating country
Level or gently rolling country with good soil
Too swampy to be of present fit for agriculture. Good hay land
Large open meadows alternate with bushland. Hay abundant
Hay meadows at this lake yielding 6000 tons
Navigation is unobstructed from Fort McMurray to Graham Landing on the Slave R. a distance of 287 miles
At Grand Rapids there is a fall of 50 to 60 feet in half a mile. Below this the river is smooth for 15 miles
Tar conglomerate Macoun 1875
Muskegs separated by pine ridges
Poplar ridge
Aspen covered country with excellent soil surrounding Lake
Highland excellent for grazing purposes

Navigation is unobstructed from Fort McMurray to Graham Landing on the Slave R. a distance of 287 miles
The Athabaska River is navigable by small steamers from above the mouth of Pembina River down to the Grand Rapids 232 miles. Between the Grand Rapids and Fort McMurray numerous strong rapids occur.
At Grand Rapids there is a fall of 50 to 60 feet in half a mile. Below this the river is smooth for 15 miles
Tar sands occur
Natural gas spring
Pelican River is about 50 feet wide. It is interrupted by numerous riffles and is navigable except near its mouth by canoes. The banks are low and the bordering country is wooded with aspen and spruce
Large areas of good land occur between the lakes
Hilly country Good grass blue-joint etc
Mushegs separated by pine ridges
Aspen covered country with excellent soil surrounding lake
Trout Lakes are situated on the summit of a swelling elevation with but one pronounced escarpment which rises to a height of 300 to 400 feet above the surrounding plains
The Loon and Wabiskaw Rivers might possibly be navigated during high water as far as Red Rapids by powerful steamers. Canoes do not require to be portaged on these rivers. The forest consists of aspen and spruce
The Clearwater is a winding river with a beautiful valley 200 ft high and a mile wide
The Cascade portage at the head of navigation for light draft steamers
